Avlite Systems Release FAA Certified L-810F Low Intensity Obstruction Light.

Tilton, New Hampshire, September 2018 –Avlite Systems announces the successful completion of FAA Certification for its L-810F (flashing) Low Intensity Obstruction Light. The FAA Certification is confirmation of Avlite’s commitment to quality products and highlights its corporate vision to deliver the highest quality aids to navigation products for the aviation market.

The L-810F is a flashing LED obstruction light and must flash simultaneously with Avlite’s L864 for marking towers 15-350 feet. The ultra-bright, energy efficient obstruction light uses a single LED optic for minimal power consumption, making it the most cost effective in the market.

Avlite’s FAA L-810F forms part of Avlite’s full Obstruction Kit Solution, a full turnkey solution for A-1 defined structures (between 150 and 300 feet) designed for easy installation, maintenance and monitoring. The kit includes all obstruction lights, necessary junction boxes and a central controller.

Designed specifically for FAA A-1 tower applications, Avlite is the only single source provider of the full obstruction lighting solution kit, with no additional components required. This provides customers convenient, easy, and the most cost-effective solution available.

For more information on Avlite’s A-1 Solution Kit [click here \(https://www.avlite.com/product/faa-a-1-obstruction-kit-solution/\)](https://www.avlite.com/product/faa-a-1-obstruction-kit-solution/) or for information on the L-810F Low Intensity Obstruction Light [click here \(https://www.avlite.com/product/faa-l-810-single-fixture-obstruction-light/\)](https://www.avlite.com/product/faa-l-810-single-fixture-obstruction-light/).
