## Avlite Systems proud to be exhibiting at *inter airport* Europe 2019

**Somerville, Victoria, Australia – July 12, 2019** – Avlite Systems are delighted to announce that we will be exhibiting at the 22<sup>nd</sup> *inter airport* Europe at the Munich Trade Fair, Germany on 8 – 11 October 2019 at Hall B5, Stand 1770.

With nearly 700 of the world's leading airport equipment suppliers expected to participate at the show this year in October, *inter airport* Europe 2019 promises to be the largest international exhibition for airport equipment, technology, design and services. The exhibition aims to deliver its vision of building better airports across the world, and Avlite Systems are excited to contribute to this common goal through our airfield, heliport and obstruction lighting solutions.

The exhibition covers all areas of airport-related technology and services with industry experts from airports, airlines, air cargo carriers and aviation-support attending the event, sharing experience and knowledge around the latest equipment and airport solutions.

Michael Walker, Head of Global Sales and Marketing at Avlite Systems is eager to showcase our complete range of airfield, heliport and obstruction solutions and stated, "*inter airport Europe represents a dedicated, real platform for business opportunities through which we consistently share our best-in-class lighting technology and solutions.*"

The team of professionals from Avlite Systems will be excited to offer demonstrations of all new products as well as presenting the entire airfield, heliport and obstruction range from Avlite, including the latest Complete Solar Airfield Lighting Solutions, including our next-generation LED PAPI and APAPI models, as well as our feature-rich, robust and self-contained AV-426.

Live demonstration events of key products and innovations will be run by Wade Evans, Product and Project Manager of Aviation and Digital at Avlite Systems, to give attendees greater insight into how our solutions are designed and manufactured to meet and exceed industry standards. We look forward to sharing details of our demonstration events closer to the exhibition.
