Introducing the New and Certified Obstruction Lighting Range

Somerville, Victoria, Australia – 22 October 2020 – Avlite's new and certified obstruction lighting is now available for pre-order. The latest AV-OL-LI, MI and CMI lights are available in AC and DC versions retaining best in class power consumption. Solar systems are also available to provide power without the need for cabling or generators.

All lighting now features concurrent IR, allowing pilots using night-vision goggles to see obstructions. Predefined general-purpose input and outputs (I/O) add versatility for the integration of the product into new and existing systems.

Our new obstruction lighting is now certified to more regulations. These include:

- AV-OL-LI and LI-D: Low intensity light available in FAA L-810, L-810(F) or ICAO LIOL Type A, B and E.
- AV-OL-MI: Medium intensity light available in FAA L-864 or ICAO MIOL Type B or C.
- AV-OL-CMI: Combined medium intensity light available in FAA L-864, L-865, L-866, L-885 or ICAO MIOL Type A, B and C.

Every light connected to our recently released AV-OL-CTRL-T1, T2 or T3 standard controller or bought as part of our AV-OL-KT range is now available with remote monitoring via SATCOM or GSM. Customers can now utilise this connectivity via our Star2M Web Portal. It provides the user with the ability to manage, monitor and control lights with access secure and reliable data. The portal can provide status reports to users when needed, simplifying the monitoring process.

The Avlite Obstruction Lighting range has been developed by our Engineering team to meet new FAA and extended ICAO regulations.

Michael Walker, Head of Global Sales, Marketing and Digital, explains that the release of Obstruction Lighting range completes months of research and development, completing our wired range.

“Avlite is proud to have developed a full line of certified wired obstruction lighting. Adding on from our Obstruction controller release, our new range is feature-rich and meets the latest FAA 43J and additional ICAO standard of LIOL Type E. Our new Obstruction lights are available for pre-order now,” said Walker.
